**Field Ops — how it actually works** · owner: Faris · started 9 Mar 2026

last edited 2026-10-02 · 7 collaborators · exported 2026-10-13

**Order confirmed**
Sales

**Parts picked**
Hub

**Parts checked**
Dispatch

**Parts checked**
Hub

**Loaded on van**
Field

**Installed & signed**
customer signs the sheet

which check is the real one??
— asked 9 Jul, no answer

**Hub run**
tech drives to the hub, picks what the group chat said. 40 min each way. Mondays, in theory.

who approves a hub run?
Daniel says Noor, Noor says Faris

**Book updated**
Noor writes the new count into the Stock sheet. The only place it is written down.

**transfer → other van**
if another tech needs it, hand it over in the car park. Tell the group.

who books this? check w/ Noor

**Delivery promise**
next working day, anywhere in the city. On the website since Sales agreed it in May.

nobody measures this.
Lena asks every Monday

**Minimum per van**
agreed per item, 3 Jun. Paper in boxes. Does not change with the week's jobs.

**Low stock**
below minimum at the Monday count → restock before the next job

agreed 3 Jun — supersedes the above

FIELD

**Job on phone**
WhatsApp from Noor: customer, branch, what to bring

**On site**
install or swap. Customer signs the sheet. DONE goes in the group chat.

… (rest of this lane never finished)

**Repair**
pull the dead unit, fit the new one. Dead one stays in the van.

DISPATCH

**Customer calls**
install / fault / new branch / paper

**Noor picks a van**
nearest zone, and the book says it has the part

تبديل القطع بين السيارات — يتم مباشرة بين الفنيين

(parts move between vans directly, tech to tech)

Noor says NO — must go via the hub.
not agreed yet

HUB

**Stock book is the record**
one row per van per item

**Monday count**
vs the shelf and the issue slips

hasn't matched since July
